Energy Sources Answer Sheet

Name _____

Date _____

Lesson 4 Electrifying Resources

2. Have your student identify at least 4 different sources of energy that are used to generate electrical power.

Answers:

coal
petroleum
natural gas
nuclear power
hydropower
geothermal power
solar power
wind power
biomass

3. Identify each source of energy as renewable or nonrenewable.

Answers:

coal—nonrenewable
petroleum—nonrenewable
natural gas—nonrenewable
nuclear—nonrenewable
hydropower—renewable
geothermal—renewable
solar—renewable
wind—renewable
biomass—renewable
